SCOPE

Some of the technologies we work with

Languages

.Net Core
C++
CSS
CSS3
Dexterity (Microsoft Dynamics GP)
Dynamics CRM 2011
HTML
HTML5
IIS
Java
Java - Swing
Javascript
Node.js
PHP
Python
Rust
Strapi
VB.Net
VB6

Framework

ADO.NET
Alpine.js.
AngularJS
ASP.net
Bootstrap
CakePHP
Devexpress .NET
Django
Flask
Jquery
Laravel
NextJs
React
React Native
Symfony 3
VUE JS
VUEjs

Data Base

MariaDB
MongoDB
MySQL
Neo4j
Oracle SQL Developer
PL/SQL
PostgreSQL
Redis
ScyllaDB
SQL Server

Infrastructure

Ansible
Docker
Docker-Compose
Dockers
Kubernetes
Packer
Terraform

CI/CD

Github
Gitlab
Jenkins
Optimize

And more

Api:
API Rest
Google API

CMS:
Wordpress

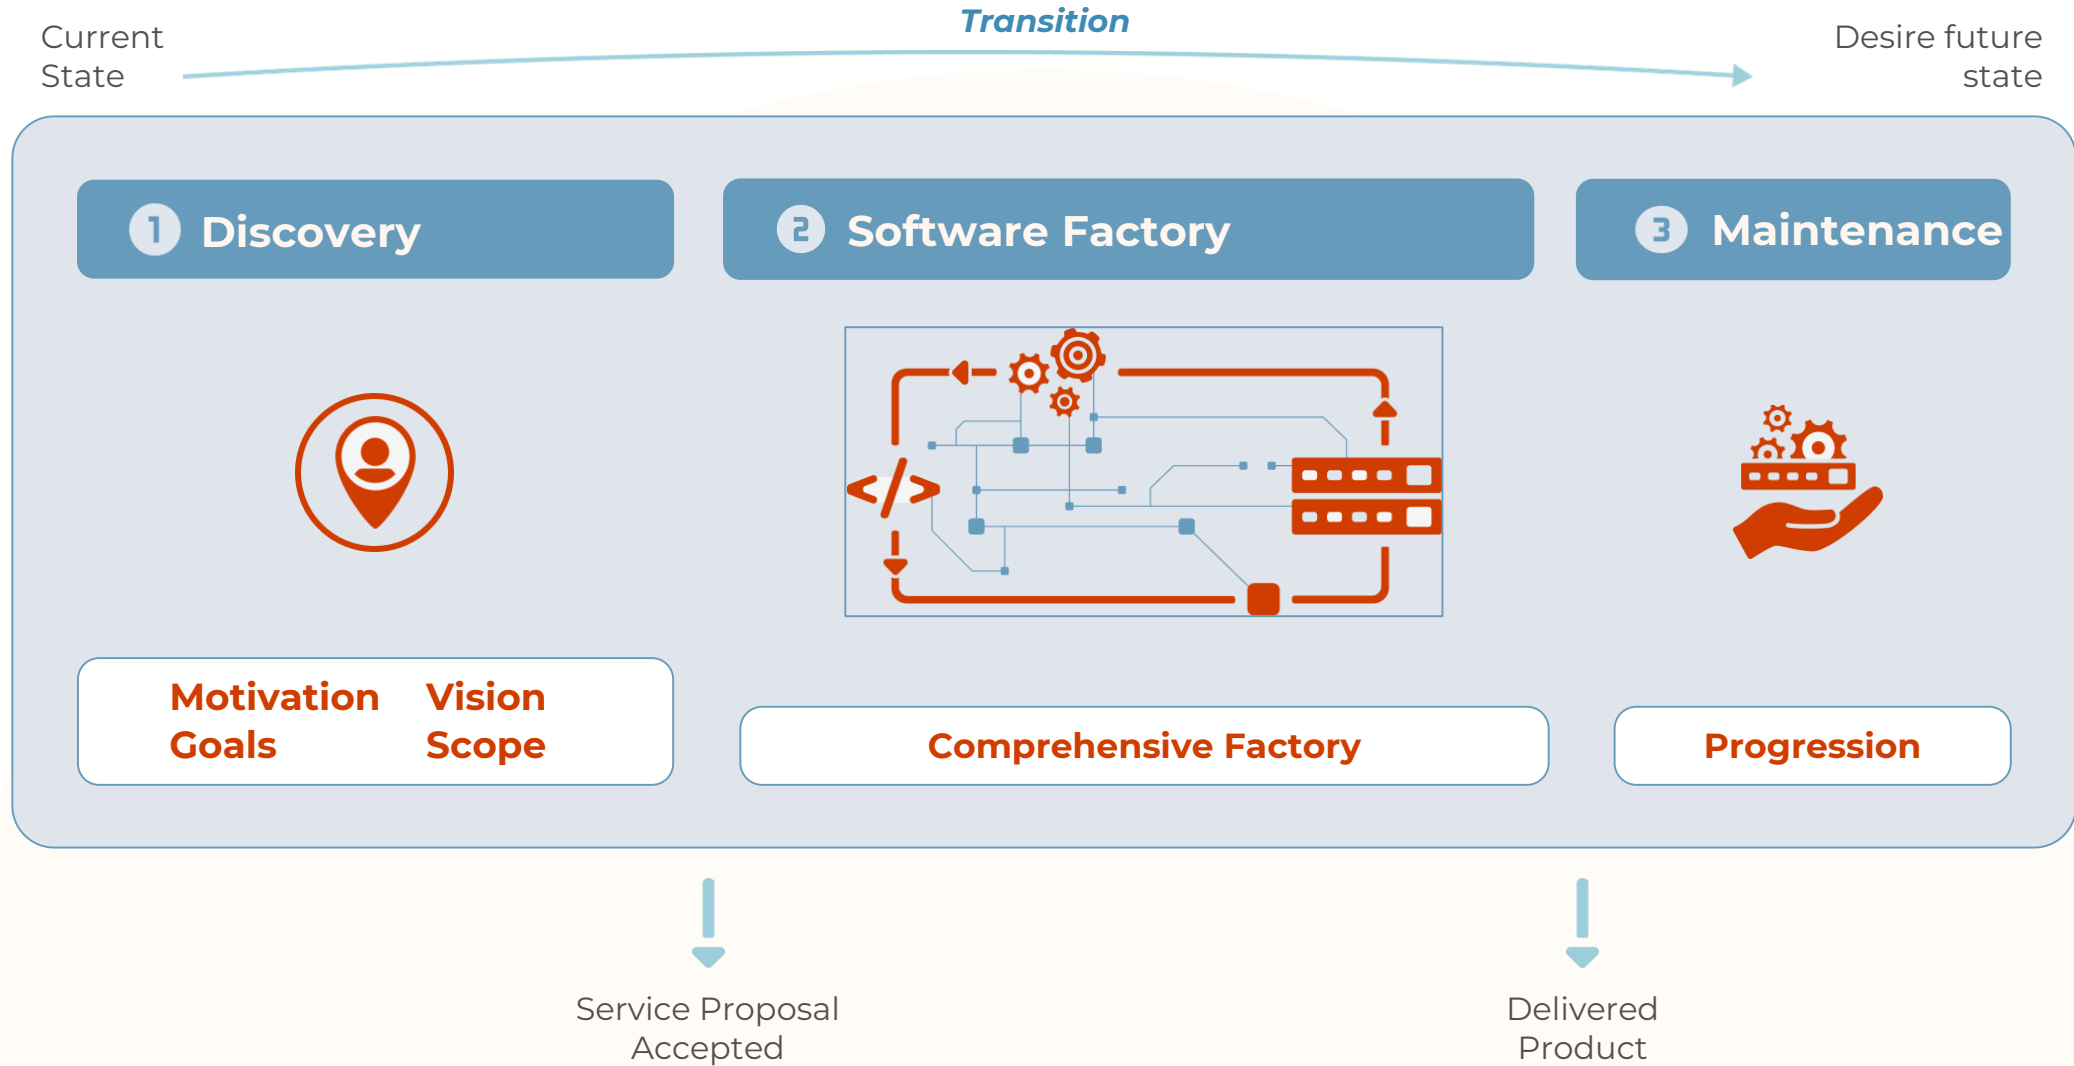

Diseño UX/UI:
Figma

Animación:
Flash CS& - AS#

Librerías:
GoJS
Kendo UI
Rubi

METHODOLOGY

METHODOLOGY

1 Discovery

Understand the need

Goal

The **goal** of this stage is to gain **a clear understanding of the need**—its origin, underlying motivations, and the vision.

It will also be necessary to have general background information about the company, the project, etc., in order to **tailor the service proposal**.

Assessment

- **Context** in which the need arises, motivation.
- **Problem** that needs to be addressed so that it leads to expected objectives.
- **Vision** of the expected solution, pillars, business model.
- **Scope** of the solution: expected functionalities are established.
- **Assumptions** based on experience and available information: assumptions that impact the scope or are beyond the scope are stated.

Service Proposal

- **Estimate performed** using the Delphi Clark Method and considering the Cone of Uncertainty.
- **Keys to success** associated with the proposal.
- **Specific Service Proposal** with estimated results in terms of effort, plan and budget.

MILESTONES

● Initial survey

● Meeting understanding
Service proposal

● Service proposal accepted

METHODOLOGY

2 Software Factory

Creating technological solutions that meet the needs

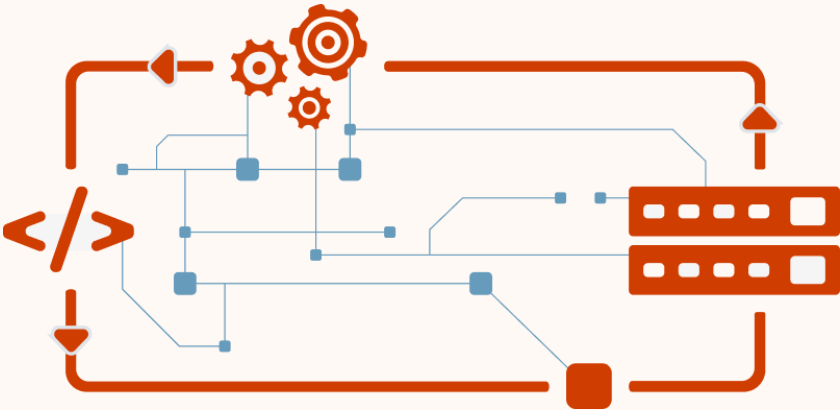

Goal

At this stage, our **goal** is **to execute a Software Factory process**, delivering innovative, user-centric digital products that drive business transformation

End-to-end Factory

From the initial idea to final implementation, it **involves designing, code writing, testing and maintaining software** so that it functions correctly and meets user needs.

MILESTONES

● Continuous Feedback

● Partial Delivery

● Delivered Product

METHODOLOGY

3 Support

Maintenance

Goal

The **goal** of the Support stage is to ensure the product continues **to perform optimally** and **meets customer expectations**

Product Warranty

- The objective of this stage is to **ensure that the delivered product functions correctly, meets the agreed requirements** and is free of defects for a specified period after delivery.
- **Support for product incidents** is included for a period of 30 days after the final delivery of the development.

Maintenance

- Once the **Warranty** period has elapsed, if continued support is required, an additional **maintenance** proposal is made.
- This may include **technical troubleshooting, user assistance, updates and enhancements, performance optimization and more.**

HIGHLIGHTS

Why Us?

★ Experience and Knowledge

We have a team of **seasoned professionals** with extensive experience in various industries..

★ Customer Focus

We focus on **understanding your needs and objectives to offer you solutions** that truly add value to your business.

★ Quality and Commitment

We strive to **exceed your expectations on every project**, delivering high-quality solutions on a timely manner.

★ Flexibility and Adaptability

We adapt to your requirements and budget, offering customized solutions tailored to your needs.

HIGHLIGHTS
